Grandma Honey's Christmas!

In loving memory of my great-grandmother, Thelma Lenor Driver (1916-2005), or as all the grandkids called her, Grandma Honey! Her love of pastels and the blankets she'd crochet for soldiers overseas are the inspirations for my design and concept. I've embodied her warm love and kind spirit by decorating a tree that is overflowing with baubles, dripping with sparkles, and then covered in a blanket of snow.

Features:

- A flocked, artificial tree decorated in a pastel palette and presented in a stunning gloss white container
- Texture and depth created by using a combination of incandescent and LED lighting

"I Need You, I Love
You, I Want You"

Furniture with Distinct Character

We wanted to create something memorable. Pieces that would give a room distinct character, while remaining discreet and light. Two side tables pair with a coffee table, each telling a different story about the tension between the organic nature of wood, and a more rigid method of fabrication called CNC. In these pieces, the edge grain of hickory plywood is celebrated. Each plane is interlocked with the next, morphing in shape from one end to the other. Seemingly growing out of the ground, the design intent pulls them to a low height while still giving them the complexity of a taller entity. Often we perceive wood as rigid and heavy. Here it becomes delicate, airy and light as we give back its organic nature through form.
